

DR. HADAEGH

IN BEVERLY HILLS

RENOWNED CELEBRITY DENTIST

LETTER FROM THE DENTIST

HELLO I'M DR. HADAEGH

The motto of my office is "quality, not quantity." And my goal is to exceed your expectations. I am committed to providing you individual attention and superior service from the minute you walk into the office until you are totally satisfied with the way your teeth look and feel. I will make sure to personally meet with you to discuss your dental concerns, objectives, and expectations.

If you are receiving a cosmetic dentistry service, I'll strive to create your "signature smile," one that fits your individual facial features, proportions and complexion and accurately reflects your personality. Collaborating with a skilled dental ceramist, we ensure unparalleled results that stand out with an artistic flair. For all procedures, I utilize the latest state-of-the-art equipment, putting patient comfort and satisfaction at the forefront.

NEIL N. HADAEGH, DDS

BEVERLY HILLS

PREMIER BEVERLY HILLS COSMETIC DENTIST

At NH Dentistry, exceptional is our standard. We don't just strive to provide the highest level of care in dentistry today; we base our practice on the expectations of tomorrow. With expert precision, advanced technologies, concierge-level care, and an ultra-luxe atmosphere, we go far beyond other practices to truly deliver our patients the best possible results. We offer comprehensive dental services with general, advanced, orthodontic, restorative, and cosmetic dentistry in Beverly Hills, California. Get to know our practice, and contact us to experience the difference for yourself.

Dr. Neil N. Hadaegh is a Beverly Hills Reconstructive & Cosmetic Dentist delivering uncompromising Beverly Hills quality combined with warmth, understanding, and personal attention. Dr. Hadaegh is a top-rated Los Angeles area dentist specializing in restoring and enhancing the natural beauty of your smile.

WE KNOW THAT DENTAL VISITS CAN BE DAUNTING FOR SOME PATIENTS, SO OUR GOAL IS TO PROVIDE YOU WITH AN EXPERIENCE THAT ALLOWS YOU TO FORGET YOU'RE AT A DENTAL OFFICE.

THE FUTURE OF

DENTAL EXCELLENCE

“THE MOTTO OF MY OFFICE IS ‘QUALITY, NOT QUANTITY.’ MY GOAL IS TO EXCEED YOUR EXPECTATIONS.”

SMILE MAKEOVER

NATURAL SMILE TRANSFORMATIONS

— ENHANCE YOUR SMILE

A Smile Makeover is a comprehensive cosmetic dental procedure aimed at transforming the appearance of your smile. It involves a combination of treatments, potentially including porcelain veneers, dental crowns, teeth whitening, or other solutions based on the individual's specific needs and desires.

Dr. Hadaegh's Smile Makeover aims to provide patients with the confidence to smile freely and radiantly.

Technology plays a big part at NH Dentistry in Beverly Hills, CA., in Dr. Neil Hadaegh's personal creation of your customized Smile Makeover. He combines his artistic talent with an eye for detail in creating a unique smile design that is highly customized based on the individual patient's needs, facial proportions, and features that would result in the most ideal, natural smile.

By having his own master ceramist at his side, Dr. Hadaegh evaluates every individual case from design to the fabrication of every individual hand-crafted porcelain veneer to ensure the patient is completely satisfied. Dr. Hadaegh will not cement any veneers until the patient sees the final veneers in place and gives their approval to ensure total satisfaction.

Undergoing a Smile Makeover at NH Dentistry offers numerous benefits. Beyond aesthetic enhancements, patients experience improved self-esteem and a boost in self-confidence. The procedure can address a wide range of dental imperfections, including chipped, stained, misaligned, or missing teeth, creating a harmonious and stunning smile that complements your unique features.

The Smile Makeover procedure begins with a comprehensive consultation, where Dr. Hadaegh listens to your smile goals and assesses your dental health. Based on the evaluation, he designs a customized treatment plan, including porcelain veneers, crowns, or other cosmetic solutions. The skilled team at NH Dentistry uses advanced technology and state-of-the-art techniques to execute the plan with precision and attention to detail.

After the Smile Makeover procedure, patients can expect remarkable results immediately. With each hand-crafted porcelain veneer or dental crown in place, the patient has the opportunity to approve the final look before cementation. This ensures that the outcome is a harmonious and natural-looking smile that complements their overall appearance.

VENEERS

Dental veneers, also known as laminates, are thin, customized porcelain shells that enhance the appearance of teeth. They reshape irregular teeth, mend fractures, and offer a solution for stubborn discoloration. Veneers provide a natural tooth look, harmonizing with gums and resisting stains. A vibrant smile boosts confidence, and while many of us know this, imperfections can lead to self-consciousness, causing us to hide our smiles.

Dental veneers offer a conservative smile makeover, embraced by celebrities like Miley Cyrus and Ben Affleck. This cosmetic solution can enhance symmetry, alignment, and color while addressing gaps, bites, and damaged teeth. Accessible and affordable veneers are available to all. Dr. Hadaegh employs advanced techniques to create stunning smiles, ensuring patients no longer need to conceal imperfections. Modern cosmetic dentistry empowers individuals to achieve their dream smiles, all thanks to Dr. Hadaegh's expertise and cutting-edge technology.

During your Veneers and Laminates consultation, Dr. Neil Hadaegh will attentively listen to your smile goals and discuss the possibilities of achieving your dream smile. He will thoroughly evaluate your dental health and facial features to design a customized treatment plan that perfectly complements your unique characteristics. Dr. Hadaegh ensures you feel confident and excited about your smile transformation by carefully explaining the process and answering any questions. Next, a series of Scans and photographs are taken to create a unique, customized smile design.

The Veneers procedure at NH Dentistry is a precise and artistic process that involves the expert application of ultra-thin porcelain shells to the front surface of your teeth. Dr. Hadaegh collaborates with a master ceramist to craft each veneer with meticulous attention to detail, ensuring a natural and harmonious look. The application is virtually painless, and minimal enamel is removed with advanced techniques to prepare the teeth. Once in place, your veneers will be carefully bonded, revealing a flawless, radiant smile that will exceed your expectations.

THE SMILE OF YOUR DREAMS

The Veneers procedure offers life-changing results, transforming your smile into one that exudes beauty and confidence. With each handcrafted porcelain veneer in place, your smile will showcase perfect symmetry and natural-looking aesthetics. The results will leave you delighted and ready to share your radiant smile. Experience the joy of newfound self-assurance as your veneers create a lasting impression that enhances your overall appearance.

Following your Veneers procedure, you may experience temporary sensitivity, which dissipates in a relatively short amount of time. Dr. Hadaegh will provide you with aftercare instructions to ensure your veneers remain in pristine condition. Regular dental check-ups and good oral hygiene will safeguard your timeless smile for years. Embrace your revitalized smile with confidence, knowing that your Veneers are a long-lasting investment in your self-esteem and overall well-being.

GENERAL DENTISTRY

YOUR TRUSTED SOURCE FOR GENERAL DENTISTRY

ORAL HEALTH CARE & WELLNESS **ALL YOUR DENTISTRY NEEDS, UNDER ONE ROOF**

One of the key aspects of general dentistry is preventive care. Dentists emphasize the importance of regular dental visits and proper oral hygiene practices to prevent the development of dental problems such as cavities, gum disease, and oral infections. By providing guidance on maintaining good oral health habits and catching issues in their early stages, general dentists help patients avoid more extensive and costly dental procedures.

DENTAL CLEANINGS & CONSULTATIONS

Preventative care is a foundation of dentistry. The American Dental Association recommends visiting your dentist regularly – usually about twice yearly – for full cleanings, examinations, and consultations for potential treatment. Professional dental cleanings help remove built-up plaque that is not removable using conventional brushing and flossing. Often, dentists are also capable of identifying potential problems that patients are not yet able to see or feel. When you maintain regular preventative dental appointments, you can stave off decay and gum disease, as well as identify the beginnings of oral health problems before they become severe.

WHAT TO EXPECT DURING YOUR CLEANING APPOINTMENT

Removal of calculus (tartar)

Calculus is hardened plaque that has been left on the tooth for some time and is now firmly attached to the tooth surface. Calculus forms above and below the gum line and can only be removed with special dental instruments.

Removal of plaque

Plaque is a sticky, almost invisible film that forms on the teeth. It is a growing colony of living bacteria, food debris, and saliva. The bacteria produce toxins (poisons) that inflame the gums. This inflammation is the start of periodontal disease!

Teeth polishing

Remove stain and plaque that is not otherwise removed during tooth brushing and scaling.

TOOTH EXTRACTIONS

Tooth extractions involve the careful removal of a tooth from its socket in the bone. This procedure is typically performed when a tooth is severely damaged, decayed, or impacted and cannot be repaired through other dental treatments. Additionally, tooth extractions may be necessary to create space for orthodontic treatments or prevent an infection from spreading.

Under the expert care of our periodontist, Dr. Jasveen Wadia, DDS, tooth extractions are performed with the utmost precision and patient comfort. Our team understands that tooth extractions can sometimes be necessary to preserve overall oral health and maintain the integrity of your smile. With a commitment to advanced techniques and compassionate care, we aim to provide a seamless experience during this dental procedure.

Tooth extraction, though often perceived as daunting, can significantly benefit your oral health by eliminating pain and discomfort from decayed or damaged teeth, preventing the spread of infection, creating necessary space for orthodontic treatments like braces, and preserving overall oral health by removing teeth that are too damaged or infected for effective treatment.

AMENITIES

Arestin

This is an antibiotic placed in the pockets to fight infection which improves gum and overall physical health. This product is most often used during a cleaning.

PREVENTATIVE DENTISTRY

Preventive dentistry is about being proactive. At our dental practice, we work to prevent dental problems from occurring in the first place. If you already have dental issues, our goal is to treat them so well that they go away. It has been shown that tooth decay and gum disease take about six months to ‘take root’ if you will. That’s why we recommend scheduling an appointment twice each year for cleaning and dental checkups.

Maintaining good oral hygiene and treating gum disease not only benefits your mouth but could also be a protective measure against heart-related conditions, emphasizing the importance of dental care in overall health management.

PREGNANCY DENTAL CARE

Not only is dental care safe during pregnancy, it is essential to your health and the health of your growing baby. This is because those surging hormones that are causing such a dramatic transformation in your body can also put you at increased risk for developing oral health issues that can affect the health of that precious baby developing inside you. One key potential result of increased hormones is gum disease which, if left untreated, can escalate to periodontal disease. Other dental issues that arise during pregnancy include erosion of tooth enamel caused by morning sickness; dry mouth – another side effect of hormonal changes, which can cause a number of dental issues; and pregnancy granuloma, a nodular red growth that can appear on the upper line of your gums.

For pregnant mothers seeking dental care, Dr. Hadaegh offers a comprehensive approach to ensure optimal oral health throughout pregnancy. It’s best to visit Dr. Hadaegh’s Beverly Hills dental office before trying to conceive for a professional cleaning and to address any dental issues, like tooth decay or infections, and assess gum health. Once pregnant, it’s important to communicate with the office about any questions or concerns, with the second trimester being the ideal time for routine dental care. However, if dental problems arise at any point during pregnancy, immediate contact with Dr. Hadaegh’s office is crucial to address infections or sepsis promptly, ensuring the safety of both mother and baby.

Bacteria and Oral DNA Testing

These are tests that give us the types and levels of bacteria in your mouth and let us know if you are pre-disposed or have genetic markers to important things like periodontal disease, bone loss, and deep pockets.

EXCELLENCE

IS OUR STANDARD...

TEETH WHITENING

RADIANT SMILES AHEAD

Beverly Hills Teeth Whitening at NH Dentistry

When it comes to achieving a bright and confident smile, teeth whitening stands as one of the most sought-after cosmetic dental procedures. At NH Dentistry, led by renowned dentist Dr. Neil Hadaegh in the heart of Beverly Hills, CA, teeth whitening is a transformative journey towards a radiant smile. With its numerous benefits, straightforward procedure, and impressive results, teeth whitening has become a go-to solution for enhancing the aesthetics of your smile.

Dr. Hadaegh whitens teeth if you have dull or discolored teeth due to age, coffee, or smoking. He and his team can improve your smile with safe, effective procedures in teeth whitening. We will create the perfect treatment plan for you – whether you're looking to lighten one slightly yellow tooth or to bleach your entire smile up to 12 shades brighter!

Treatment options vary according to your unique situation. For example, in some cases, the right cosmetic dental treatment might involve porcelain veneers rather than whitening. Another factor to consider is that crowns, fillings, and bridges do not react to bleaching procedures, so you might also want to consider this: update old, yellowed, or metal dental work in addition to your smile whitening. Dr. Hadaegh also offers Zoom!® Whitening for a bright new smile in an hour. He also offers advanced KÖR Teeth Whitening for teeth that do not respond to other bleaching methods. Whatever your situation, rest assured we are experienced in identifying and then traveling the best path to lead you to an improved, brighter smile.

One of the most exciting aspects of teeth whitening is the remarkable and immediate transformation it offers. After a single session, you can expect your teeth to be several shades brighter. This instant improvement can boost your confidence and make you more comfortable showcasing your smile. The results achieved at NH Dentistry are not only impressive but also natural-looking, ensuring that your smile remains authentic and genuine.

DENTAL IMPLANTS

A LASTING SOLUTION

DR. HADAEGH – A REAL ARTIST IN COSMETIC DENTISTRY

Dental health is not just about aesthetics; it plays a crucial role in overall well-being. Missing teeth can impact speech, eating habits, and even self-confidence. Fortunately, modern dentistry offers a remarkable solution to replace missing teeth and restore smiles – dental implants. At NH Dentistry in Beverly Hills, California, Dr. Neil Hadaegh and his expert team are dedicated to providing patients with state-of-the-art dental implant solutions, transforming lives one smile at a time.

Dr. Hadaegh offers **dental implants in Beverly Hills**. Dental implants are artificial roots and teeth (usually titanium) surgically placed into the upper or lower jaw bone. The teeth attached to implants are very natural-looking and enhance or restore a patient's smile! They are a growing phenomenon in replacing missing teeth and may even be used to replace multiple missing teeth as an alternative to dentures.

USED FOR:

- Restore or enhance facial tissues.
- Restore a patient's confident smile.
- Restore chewing, speech, and digestion.
- Replace one or more missing teeth without affecting adjacent teeth.
- Support a bridge or denture, making them more secure and comfortable.
- Resolve joint pain or bite problems caused by teeth shifting into missing tooth space.

Dental implants are a life-changing solution that can restore confidence, functionality, and aesthetics to your smile. At NH Dentistry in Beverly Hills, Dr. Neil Hadaegh and his team are committed to providing personalized and exceptional dental implant treatments. Contact us today to schedule a consultation and discover how dental implants can enhance your quality of life.

Dental implants offer numerous benefits (including many benefits over dentures):

- Easier to chew and eat foods than dentures.
- Very durable and may last a lifetime with routine care.
- Restore your smile with a greatly improved appearance.
- Comfortable – they act as any normal, regular tooth would.
- Improve your speech as they work better than dentures that may slip.
- Convenience – no need to remove implants as you would with dentures.
- Enhanced self-esteem – a restored smile results in a significant boost to your confidence.

Not everyone is a candidate for dental implants. In order to find out whether or not you're a candidate for dental implants or to find out cost and pricing information, we urge you to schedule a consultation with our [Beverly Hills dental implant dentist](#), Dr. Hadaegh. For more information or to schedule an appointment, either call our office @ **(424) 478-9476** or fill out our [online contact form](#), and we will respond promptly.

You will receive care instructions when your treatment is completed. Good oral hygiene, eating habits, and regular dental visits will aid in the life of your new implant. Following the implant placement, some discomfort, swelling, or bruising may occur, but these symptoms are typically mild and can be managed with pain medication and cold compresses. Dr. Neil Hadaegh and his team will provide you with detailed aftercare instructions to ensure a smooth recovery process. Maintaining good oral hygiene practices and attending regular check-ups will help ensure the longevity and success of your dental implants.

PRECISION AND PERMANENCE

A STABLE SOLUTION TO REPLACE MISSING TEETH

OUR PRACTICE

WELCOME TO OUR LEADING BEVERLY HILLS DENTISTRY PRACTICE
